RWANDA 2019
BIBLIOGRAPHIE

The University of Texas at Austin

5 janvier 2020

Présentation

Sur le modèle des précédentes, cette bibliographie recense les publications portant en tout ou en partie (conséquente), sur le Rwanda qui ont paru pendant l'année 2019.

Elle est organisée par sujets ou disciplines: Histoire, Population, Agriculture, Environnement, Economie, Politique, Droit, Société, Arts et Lettres, Santé Publique. Un dernier chapitre recense les travaux de recherche universitaire (PhD et Masters), tous sujets confondus, et les *book reviews*. Les publications sont scientifiques, universitaires, para-universitaires, officielles (gouvernementales, non-gouvernementales, institutionnelles) ou littéraires mais pas journalistiques, faute de place. Les publications des éditions EUE, LAP et Scholars' Press sont classées à part (10.5); ce sont pour la plupart des travaux de licence ou de maîtrise, rarement de doctorat.

A priori, et sauf pour quelques livres et chapitres de livres qu'il faut se procurer sur papier, pratiquement toutes les entrées citées ici sont accessibles, avec ou sans *paywall*, sur Internet.

Une bibliographie s'efforce d'être complète mais ne pourra jamais l'être tout à fait, à l'heure des *digital databases*. Les publications en kinyarwanda ou dans des langues autres que le français et l'anglais nous échappent en grande partie. Il reste que la masse des publications est écrite en anglais. On aura négligé d'insérer tel rapport d'institution ou d'ONG ou telles pages de ce qu'on appelait "la littérature grise" et qui aujourd'hui abondent sur Internet. Le chapitre Santé Publique, la section "Natural Sciences" (10.2), la liste des PhDs/Masters, les *book reviews* sont sans doute incomplets. Croit-on avoir terminé le travail? Une ultime recherche montrera que le puits du savoir est sans fond, on trouvera toujours des citations nouvelles.

Une section peut être rattachée à son chapitre par défaut ou de force. Le classement est aussi pratique qu'il est épistémologique. La bibliographie entend lister tout ce qui mérite d'être connu (*browse or read*) par un chercheur, mais la matière est si diverse qu'on a rangé certaines entrées comme on a pu.

Les entrées surlignées en gris sont des livres. On ne cite chaque entrée qu'une fois, ce qui fait qu'un article ou un livre pouvant être a priori listé dans deux sections (ex. Femme et Economie, ou Politique et Société) n'apparaît que dans un seul chapitre. La *search key* fait fonction d'index et permettra de retrouver les citations pertinentes listées hors de leurs chapitres "naturels".

Même si pratiquement toutes les entrées moissonnées dans les catalogues et les bases de données ont été vérifiées (Google Scholar est riche mais regorge de petites erreurs quand Worldcat reste la meilleure des *databases* gratuites), des erreurs et surtout des omissions sont inévitables. On est prié de nous en excuser et de nous le signaler.

Happy reading!

² Research Methods in the Social Sciences and Humanities: Research in developed countries is often considered as a means to pave the way towards sustainable development in different areas of the society including science and technology, the economy, governance and security. Researchers in developing countries rarely have the opportunity to use their indigenous languages to design, plan and conduct research. Nor do they communicate in their indigenous languages to share their insights and learnings from other parts of the world with colleagues or students. Utilising the languages that researchers, students and teachers, policymakers, the community, and others interested in research understand better can help to generate new knowledge embedded in local realities where sustainable development needs to take root. That is why this book is in Kinyarwanda. The authors hope that writing this book in Kinyarwanda will increase research capacity in the humanities and social sciences in Rwanda and in the region. And that it will increase interaction between all key stakeholders in the planning and conducting of research as well as in analysing, monitoring and evaluating the research process and its outputs [From the Publisher]
